

Tractor Mounted Scarifier **Rotorake TM1000**

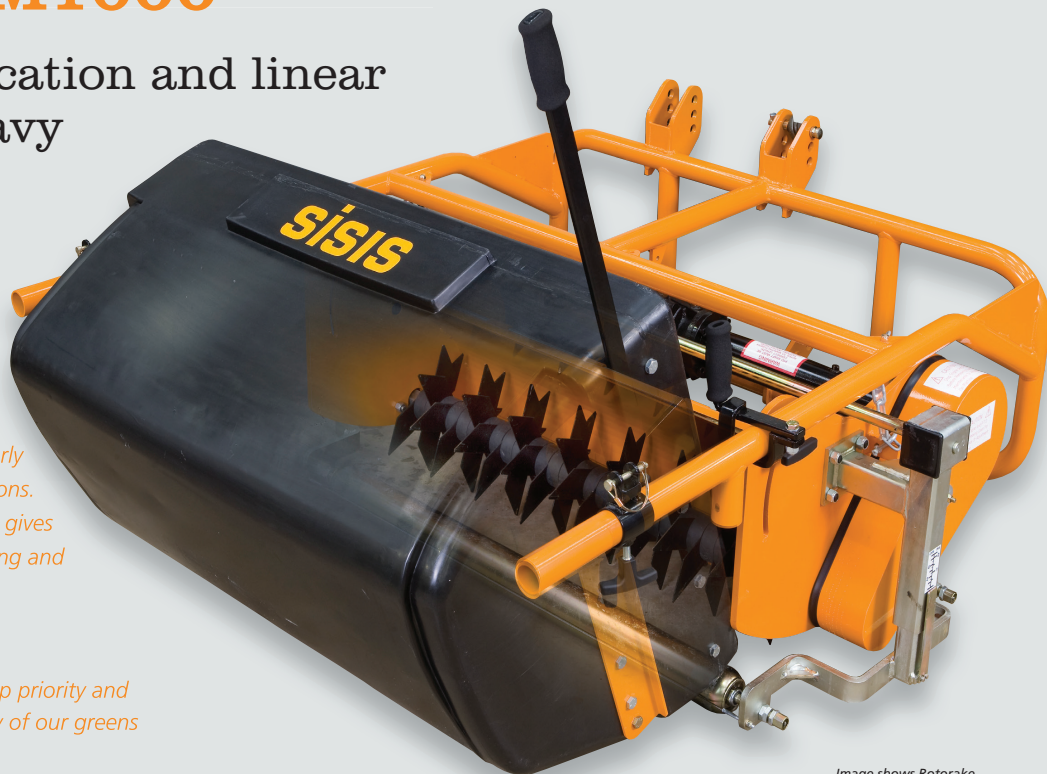

Combined scarification and linear aeration with heavy duty power

"A fantastic heavy duty scarifier, particularly for end of season cricket square renovations. Easy to set up, operate and maintain and gives an outstanding finish ready for overseeding and top dressing."

Mike Atherton – Head Groundsman – King Williams College

"Reducing thatch on our greens was a top priority and since purchasing the TM1000, the quality of our greens have significantly improved."

Richard Wallis – Head Greenkeeper – Wishaw Golf Club

*Image shows Rotorake
TM1000 model*

A specially designed tractor mounted unit with a choice of five quick release interchangeable reels to aid the removal and control of thatch and help to reduce standing surface water by improving water infiltration. Features include a contra rotating reel for a clean consistent performance with a selection of various blades to suit key tasks.

The weight of the collection box and material is carried by the main frame on the front roller and independent from the reel, so when in use the additional weight does not force the reel to scarify deeper than has been set.

Contra rotating reel ensuring excellent performance

Easy to use manual tip system

Large capacity collection box, shown with optional hydraulic tip kit

MODEL: ROTORAKE TM1000

Code: **FS1258**

Working width: 1000mm (40")

Tractor power requirement: 18-20hp minimum

Working depth: 50mm (2") max (with scarifying reel)

Includes collection box.
For details of reels see below:

FULL SPECIFICATION AVAILABLE ON www.sisis.com

UNIQUE FEATURES:

- Floating unit to follow ground contours
- Fast ground coverage
- Interchangeable reels and optional variable spacing allows key tasks such as scarifying, linear aeration, verticutting and brushing to be carried out
- Quick release reel system
- No tool depth setting for fast, simple adjustment
- Contra rotating reels ensure a clean consistent groove
- Standard Cat. 1, 3 point linkage
- When used without collection box, scarifying unit can be off set so that the wheels do not run over the removed thatch
- Optional hydraulic tipping kit

Rotorake Easy to Change Reels

Reels	
1mm light scarifying/verticutting reel	FS1260
1mm replaceable, wear resistant tungsten tipped blades. Can be used throughout the season.
